Circle Garage

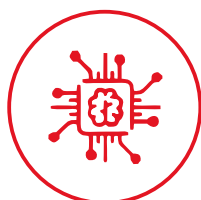

WEB AND MOBILE TECH, IOT, HYBRID CLOUD AND VR/AR

The Digital Era has created new, unique opportunities for companies to take their business to a new level. Ever changing technologies requires transversal skills, a strong bias to R&D and a solid focus on results. Circle Garage brings it to your company so you can focus on what really matters for your customers.

About CG

We are a passionate team of tech-enthusiasts who loves to bring to life new technology solutions to help companies to reach their goals. FCA, Maserati, Magneti Marelli, Edison Energia and Leonardo have already chosen us as a partner thanks to our competences, good-values and trustworthiness.

Approach

Innovation
Oriented

Circle Garage is a spin-off of the Italian Institute of Technology founded in 2013. As an innovative SME, we supports small, medium and big companies on ICT landscape, helping to improve company process and customer satisfaction.

Our expertise

Our competences are built on top of our team expertise, bringing modular and scalable solutions to maximize the Return of Investment (ROI) for our clients.

Internet of Things

We connect “things” to each other, managing data flows and security to create new integrated systems to bring new value.

Hybrid Cloud

We own the expertise to work on various environments such as cloud, on prem or hybrid solutions.

VR & AR

We embrace VR/AR technologies to let users get immersive experiences, helping business spread messages more effectively.

Multi-Platform Development

We deliver our software to microcontrollers likewise smartphones bringing portability and scalability to reduce costs.

Microservice Approach

This approach makes software modular and cuts development time, allowing continuous delivery of complex applications.

Innovation Oriented

Thanks to our consistent R&D process, we provide stable cutting-edge technologies and speeding-up delivery time.

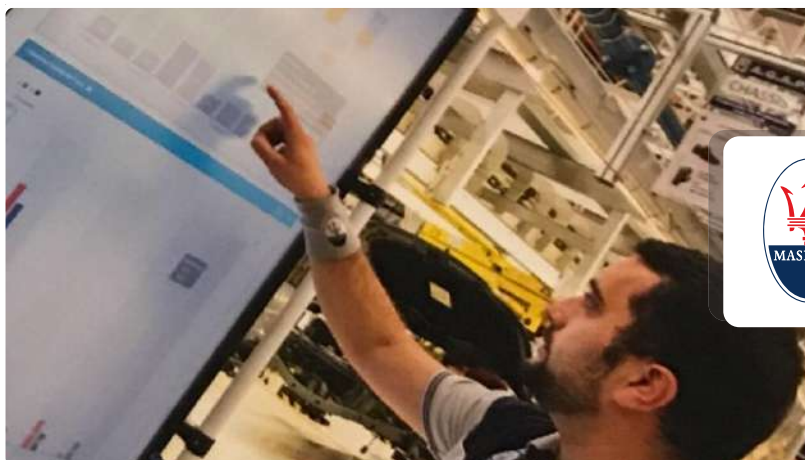

Technologies

Portfolio

▲ Maserati - Digital Totem

Development of web-app connected to various assets to converge data on touch panels along the production line to improve line performances such as maintenance, quality and safety.

▲ Leonardo - Holo Presenter

Development of a touch holographic screen that allows users to interact with 3D models of a Leonardo product for events and fairs to get new leads.

▲ Edison Energia - Plant Museum

Development of a immersive 3D environment to show different Edison plants around Italy and explain how Edison Energia works to bring clean energy to their customers, promoting eco-sustainability and acquiring new leads.
